Welcome Message We are pleased to welcome you to the 11th JFBS Annual

The digital transformation(DX) is one of the major trends

in society today, Regardless of whether you are in a private. public, or not-for-profit sector, DX is on top of the agenda of their management teams. With the rapid progress of IoT, AI, data analytics and telecom technologies, the thrust of IT revolution since the turn of this century is gaining momentum even further. And the pandemic of COVID-19 reemphasizes the critical role

Conference. The Conference examines the topic of "Digital Transformation(DX): Social Value Creation, Sustainability,

and The Role of Digital Technologies".

of IT in estimating and controlling the pandemic. After all, business and society are urged to manage and execute these transformations in a sustainable way. On the contrary to the increasing importance of digital technologies, there also exists some institutional resistance, conscious or unconscious, against its rapid penetration into our real life triggered by profound changes in the ordinary way of work and traditional social structures and orders. For example, under Covid-19, some critics claimed that the excessive use of online teaching

planet in a sustainable fashion. The aim of this year's Annual Meeting is for scholars and busines spersons from around the world to better understand the positive and negative impact of digital technologies on society and to examine how those technologies contribute to the sustainable development of business and society and strategies to create social values. General topics on Business and Society are also discussed. We would like to give special thanks to all partners and supporters. Although the communications in person are still limited due to the Covid-19, we hope

to have fruitful interaction by utilizing the power of digital technologies.

in universities is socially unacceptable. Despite such an embedded conflict between digital technologies and human societies, we recognize the positive value of these advanced technologies outweigh their downside when solving difficulties and inconveniences in society and pursuing well-being of the whole

Conference Program Committee · Masahiro Okada (Professor, Keio University, Japan) · Kanji Tanimoto (Professor, Waseda University, Japan)
